

## KLEINBURG RESIDENCE

**Location:** Kleinburg

**Masonry Contractor:** Medi Group Inc.

**Architect:** Steven Hunt Design

This stunning private residence features 35,000 modular size brick, 6,500 sq. ft. of Natural South Bay Stone and approximately 3,000 sq. ft. of precast detailing. The enclosed loggia and kitchen feature interior stone accent walls, creating an old world ambience; brick and natural stone were also used to construct four wood-burning fireplaces. Among the most challenging elements encountered was the installation of curved precast for the front turret, and the front entrance portico walls, installed with the help of a crane. Due to such complexities, and the owner's desire to have the natural stone sorted by colour, the job took 17 months until completion.
